August 11, 2000

Thank you for returning to my office in January of 2000. I am enclosing some photographs of a recent patient that we performed labial reconstructive surgery on. Although these scars are fresh, I believe that you can appreciate from the photographs that there is a marked improvement in labial reconstruction and natural protection of the vagina. This surgery included dissection, elevation, and transfer of bilateral gracilis muscle flaps utilizing endoscopic techniques.

I thought that you would like to see these photographs in your deliberations of whether you plan to proceed with this surgery or not.

I hope this answers all of your questions. If you have any further questions please do not hesitate to write, call, or fax my office. I look forward to seeing you again in the near future.

Yours sincerely,

David A. Gilbert, M.D., FRCS(C), FACS

DAG/A-Paige/smg
